Jan: 13. 1839

My dear Fisher

I am sorry that my last letter was not so clear as I intended. I meant that I not only could not come on the ~~14th~~^{23rd} day you mentioned but also that I could not come ~~at all~~ ~~at all~~ this vacation. Since no one seems inclined to sound my praises for me I must do it for myself - I really never changed my mind once, for there are few things I should like better than to come & see you, but I am prevented from doing as I like. I am very glad to hear that you are better again. I have just been asking a doctor about bilious people he says that it is often brought on a sedentary life, so I think we had

letter make another pair of bellows or something of that sort. I am very glad you are coming to town soon, let me know as soon as you arrive. I want you to see my battery. If you cannot collect the salt I do not think I can, how would it do to ~~put~~ a lump of the mud into some water & then separate the salt by crystallization? I miss my laboratory very much. I begin to be in a great fright about reading. I have done nothing since I have been home. Robert says I am looking much better than when I came home so I suppose ~~reading~~ illiness agrees with me. I went to a horse party a few days ago the room was so small that I had to stand in the hall & the street door was open. only fancy! I was in a daze. I want to go and see some things but I shall not till you come. There is an electrical bell in the room.

Pray remember me to Mr Fisher & to Emma. by the way Bingham has never returned my call. I hope he does not think I had anything to do with the uneternal love. Anna sends her love to Mr Fisher & Emma & desires to be remembered to you. Believe me to remain
Yours sincerely
John Constable

The Homeopathic (is that the way to spell it?) system is this: the smaller the quantity of any med: you take the more violent its effect.
2nd Any substance which will produce the same effects as any disease will cure that disease. — Thus — if you are sick take tartar emetic. if you are drunk — drink more. if you have an attack of indigestion eat the most indigestible things you can get.
Annual Mag: is this if you wish to send a person to sleep never leave only to wag your hand before the persons face & wish to send him to sleep & off her she goes
